## 1. Introduction

This report has been prepared by the Conservation and Urban Design Team at Lichfield District Council to gain approval for the addition of buildings and structures onto Lichfield's register of buildings of special local interest.

It is intended that this will be the first report of a rolling programme of reports to be presented to the Council until all areas of the district have been reviewed.

### 1.1 Background to the Lichfield District Council Local List

Currently Lichfield District Councils Local List only covers buildings within some of the 22 designated Conservation Areas. These buildings were assessed at the time that the conservation area appraisals were carried out. However, there are numerous buildings and structures across the district which are locally important, and are currently not identified. Whilst the local listing does not offer the same level of protection as statutorily listed buildings, they do become a material consideration within planning decisions, allowing the opportunity for their local distinctiveness to be taken into consideration through the planning process.

The district has been divided into six areas, that will be assessed on a rolling program moving forward to ensure that as many locally important buildings as possible are incorporated into the final list. The current register of buildings of special local interest (local list) contains 484 entries. These will also be reassessed as part of the process.

A Local List is a list of heritage assets within the district considered by the public, and council, as having special local architectural, archaeological or historic interest, but that are not statutory listed. The heritage assets included in the Local List are considered to be of significance to the local community and to contribute to the environmental and cultural heritage of the district.

The term 'Heritage Asset' is described in the [National Planning Policy Framework \(NPPF\)](#) as 'A building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decision, because of its heritage interest'. Heritage assets include designated heritage assets and assets identified by the local planning authority (including Local Listing).

The Local List:

- provides clear, comprehensive and current information about non-designated heritage assets that exist within Lichfield District
- helps to develop a better understanding of what local communities consider to be important in their local historic environments
- celebrates the rich variety of features that give Lichfield District its unique qualities

## **1.2 Criteria for the Selection of Locally Important Buildings**

A wide range of building, structures or areas can be considered for local listing. As well as the traditional house, pub or shop structures such as bridges, telephone kiosks, walls, parks, landscapes, war memorials, statues can be included. [See Appendix A]

## 2.0 Burntwood

Despite the rich history of Burntwood, there are only 15 listed buildings within the parish. Section 11 of the Burntwood Neighbourhood Development Plan sets out a policy aimed at protecting locally important non-designated heritage assets.

### **Policy B8**

#### **Conserving and Enhancing Local, Non-Designated Heritage Assets**

- Development proposals should identify and assess any potential impact on local, non-designated heritage assets.
  
- Development proposals will be supported when they conserve and enhance local, non-designated heritage assets.
  
- Development that would result in the loss of, or have a significant adverse impact on local, non-designated heritage assets will only be supported in the following circumstances;
  - a) where renovation or alteration of non-designated heritage assets require planning permission, such changes are designed sensitively, and with careful regard to the heritage asset's historical and architectural value and pay appropriate regard to the asset's setting; or
  - b) where a development proposal would result in the loss of, or substantial harm to a locally non-designated heritage asset, such development will only be supported when public benefit of the proposed development outweighs the loss or harm to the asset and its setting. Where development is permitted, this may be conditioned in such a way as to ensure the proposed development takes place after the loss, or harm, has occurred; and that appropriate recording of the heritage takes place prior to any loss or harm.

## Appendix A – Local List selection criteria

	Criteria	Description	Notes
1	<b>Age and Rarity</b>	<p>a) Does it contain any significant features dating from before 1700?</p> <p>b) If 1700-1840, does it substantially retain its original design and architecture?</p> <p>c) If 1840-1919, is its design and architecture locally characteristic of the period?</p> <p>d) If 1919-1939, is its design and architecture of exceptional local interest and quality?</p> <p>e) If after 1939, is its design and architecture of outstanding local interest and quality?</p>	<p>The older an asset is and the fewer surviving examples of its type, the more likely it is to have local interest. Some selectivity will be required to include only the best examples from the Victorian and Edwardian periods. Assets dating from post 1910 will require even greater selectivity. Only high quality examples from the inter-war and post-war period will be selected. Assets less than 30 years old will not be considered eligible for inclusion. A building's architectural and historic interest may have been devalued via cumulative intervention and inappropriate repairs. The more intact and 'complete' a building is the greater likelihood it is to be considered for local listing.</p>
2	<b>Aesthetic Interest</b>	<p>a) Is it of innovative and distinctive design, architecture, or materials?</p> <p>b) Is it an exceptional instance of local design, architecture, or materials?</p> <p>c) Is it of exceptional local aesthetic merit?</p> <p>d) Was it built or designed by a nationally important architect, artist, or designer?</p> <p>e) Was it built or designed by a locally important architect, artist, or designer?</p>	<p>Heritage assets which are locally important for the interest of their architectural design, decoration, materials or craftsmanship. These include locally important examples of particular asset types, which demonstrate good design qualities, including form, proportions, attention to detail, innovation and articulation. The building or structure should be a well-executed example of a particular architectural style and contributes to local character. The appearance of an asset is an important consideration in the selection process. This includes assets</p>

			which reflect local traditions of design, craftsmanship and materials. The asset may be highly decorative, or of plain form and detailing, but should have aesthetic appeal. Selection may consider the wider contribution of the building, structure or group to the local townscape.
<b>3</b>	<b>Group Value</b>	<p>a) Does it contribute significantly to the character, ambience, or setting of a nationally or locally listed heritage asset?</p> <p>b) Does it contribute significantly to the townscape, landscape, street scene, or perspective of a nationally or locally listed heritage asset?</p> <p>c) Does it contribute to the character of a conservation area?</p> <p>d) Does it contribute to the local street or town scape?</p> <p>e) Does it indicate a boundary of historic significance?</p>	Certain buildings or structures are part of a larger group of similarly designed buildings or structures, which together create a distinctive local environment. Examples include houses in a terrace, different buildings in an estate designed by the same architect which share common design features, a range of buildings in a similar architectural style, and buildings which use the same palette of locally distinctive materials.
<b>4</b>	<b>Historical Interest</b>	<p>a) Is it associated with a person of national historic reputation?</p> <p>b) Is it associated with a person of local historic reputation?</p> <p>c) Had it a significant and distinctive role in local history, such as cultural, political, civic, educational, social, religious, economic, industrial, agricultural, transport, or military history?</p> <p>d) Had it a significant role in national history?</p> <p>e) Is it recognised as a national or local war memorial?</p>	Heritage assets, which illustrate important aspects of Lichfield's social, economic, cultural, industrial, religious or military history. These include buildings and other structures, which have a close historical association with locally important people, families or events. These assets may be representative of a particular phase of Lichfield's history, including those with communal, spiritual, cultural or artistic importance.

		f) Does it commemorate an event of particular national or local historical significance?	
5	<b>Designed Landscape Interest</b>	<p>a) Does it retain some or all of its historic features, layouts, and planting?</p> <p>b) Does it possess special local significance for its recreational, cultural, historic, or aesthetic value?</p> <p>c) Does it provide views of the surrounding townscape which are visually significant or satisfying?</p>	
6	<b>Landmark Interest</b>	a) Is it a landmark asset in the area, due to its strong communal or historical associations or its striking aesthetic value?	Assets which, due to their scale or siting, stand out positively in their surroundings. They create visual interest and contribute to the local townscape due to their scale and location. Their position might be on a corner plot where they act as a focal point in the streetscene or on a site where they can be seen in longer views.
7	<b>Social and Communal Value</b>		Buildings or sites which have associations with local social or economic activities, events, traditions, practices or wider history. They are often perceived as a source of local identity, distinctiveness, social interaction or coherence. Such properties may be based on intangible aspects of heritage such as the 'collective memory' of a place. Examples include civic buildings, which are reflective of local pride and distinctiveness.
